

Structural Format:

In-office training program: 6 hours in duration (subject to change pending size of practice)

Training provided by Jo-Anne Jones and/or Beth Ryerse

Jo-Anne Jones, RDH – 2017 Dentistry Today CE Leader, DPR Top 25 Women in Dentistry, President, RDH Connection Inc., Certified in Class IV & ICLE/WCLI Soft Tissue Diode Laser Use www.jo-annejones.com

Beth Ryerse, RDH – Soft Tissue Management Specialist, International Lecturer, CDHA Board Director, Certified in Class IV ICLE Soft Tissue Diode Laser Use www.bethryerse.com

Upon certification the attendee will;

- Possess an understanding of laser physics and tissue interaction
- Apply the science and evidence behind laser use in dental hygiene therapy
- Understand the proper settings and safety of laser use
- Understand the integration of the laser into the dental hygiene appointment
- Understand the regulatory body stance related to use of lasers, codes and billing for dental hygienists
- Introduce the laser to the dental hygiene client and respond to FAQ

Course includes;

- Course handouts
- Goal layering activities in addition to 6 hours of training
- Skills competency exercises and hands-on training providing opportunity to be both clinician and client
- Instruction on stripping and cleaving fibre
- Set-up instruction, settings and laser safety
- Final test & self-assessment of skill competencies
- Client introductory letter to lasers for the practice
- Certificate of completion

Location:

- Your practice location (travel expenses may apply)

In-Office Training Fees:

Fee: \$395 + HST per RDH payable day of training; \$199 + HST per DDS (hands-on certification is not provided for DDS)

Contact Information:

Testimonials:

Great course that provided an understanding of the physics of lasers and hands on demonstration. Tracy H., RDH

Great Presentation! I came in with little knowledge on lasers and feel very comfortable using the laser now. Laurie D., RDH

Most thorough presentation and 'hands-on' course we've ever had. Thanks again. Appleday Dental Practice, Ontario.

"I would like to thank you for coming to our office and completing the training with us. You were very thorough and explained everything in detail which was very beneficial for our team. The fact that you spent extra time with us and allowed us to have the hands on experience through the training session was once again very beneficial. We are more comfortable and confident having gained the practice through our training session and as a result it will help the whole team seamlessly integrate the laser into our practice." Raluca Cernestean, RDH

I wanted to let you know we've been incorporating laser treatment into our treatment plans with patients and so far amazing results and feedback from patients. Anne-Marie P., RDH
